AREA Science Park, with the financial contribution of the European Social Fund within the Operational Regional Programme of Friuli Venezia Giulia region, has developed TALENTS³ Project, the fourth edition of TALENTS Fellowship Programmes. The Project is conducted within the long-term strategy for the internationalisation of the Friuli Venezia Giulia scientific system, pursued by AREA Science Park within the CER - Coordination Network of Research institutions of Friuli Venezia Giulia.

TALENTS³ offers:

- **Activity 1:** 7 **outgoing research grants** to carry out projects at a foreign scientific institution or enterprise developing R&D activities, located in the territory of the EUSAIR or of the EUSALP macro-regional strategies, with mandatory return to Friuli Venezia Giulia region. The activity is addressed to researchers resident in the Friuli Venezia Giulia region.

- **Activity 2:** 7 **incoming research grants** to carry out projects at one of the scientific institutions belonging to the CER or at one of the enterprises established in the regional territory and implementing R&D activities. The activity is addressed to researchers resident in the territories part of the EUSAIR and of the EUSALP macro-regional strategies.
