

13th Humboldt-Tag at KIT on July 27, 2017, 12.30 pm

Support of Internationally Mobile Researchers
Senatssaal (building 11.30), 12.30 pm, Campus South

Ladies and Gentlemen, Dear Colleagues,

The international Scholars and Welcome Office (INTL) of KIT and the Alexander von Humboldt Foundation (AvH) are highly pleased to invite you to this year's Humboldt-Tag: Excellent international researchers of the Humboldt Network, experts for researchers' mobility, representatives of service units, interested scientists of all career levels, and future hosts at KIT will be given the opportunity to talk to each other and exchange information.

Professor Dr. Thomas Hirth, Vice President for Innovation and International Affairs at KIT, and Professor Dr. Caroline Y. Robertson-von Trotha, Director of the Center for Cultural and General Studies (ZAK), will open the Humboldt-Tag. Then, the International Affairs (INTL), Research Office (FOR) and Innovation and Relations Management (IAM) service units as well as the Young Investigator Network (YIN) of KIT and the Humboldt Regional Group Karlsruhe-Pforzheim e.V. will present funding options and services offered to the general audience and give advice to individuals.

After this, Dr. Thomas Hesse, Deputy Secretary General of the Alexander von Humboldt Foundation, will speak about funding programs and support for internationally mobile researchers as well as about the worldwide network of Humboldtians.

In the course of the Humboldt-Lightning Talks presented by Philipp Schrögel, Humboldt Fellows will provide short insights into their current research work at KIT. The Humboldt-Insights presented by Professor Dr. Robertson-von Trotha are devoted to Humboldt Fellows talking about their international experiences. Particular thanks will be expressed to Professor Dr. Herbert Gleiter (INT) for his extraordinary merits and his commitment as a host of a number of Humboldt Fellows and guest scientists from all over the world at KIT. The laudation will be made by Professor Dr. Horst Hahn (INT).

The Humboldt-Tag will be completed by a get-together for an aperitif, where scientists will have the opportunity to talk to each other in a relaxed atmosphere.
