

# Double Degree Program for Industrial Engineers

One program, two countries, two degrees

As an Industrial Engineering and Management student at the KIT you can participate in the German-French Double Degree Program in cooperation with the Grenoble INP - Génie Industriel, UGA.

Choose between different tracks and receive the **Double Master's Degree** or the **KIT-Master + French Engineering Degree**.

## Double degree, double chances

Learn about the French culture, improve your French language skills and benefit from international experience. Be a student of both universities and combine practically designed studies at the Grenoble INP with the independent and autonomous learning at the KIT Department of Economics and Management.

*„ ... the double degree program allows me to immerse myself in the culture of the host country... ”*

*- Laura -*

*Open the door to international job opportunities and expand your network in Europe!*

**Application deadline: 1st of December**
